What's Your Learning Style? The Results

Your Scores:

- Auditory: 40%
- Visual: 30%
- Tactile: 30%

You are an **Auditory** learner! Check out the information below, or [view all of the learning styles](#).

Auditory

If you are an auditory learner, you learn by hearing and listening. You understand and remember things you have heard. You store information by the way it sounds, and you have an easier time understanding spoken instructions than written ones. You often learn by reading out loud because you have to hear it or speak it in order to know it.

As an auditory learner, you probably hum or talk to yourself or others if you become bored. People may think you are not paying attention, even though you may be hearing and understanding everything being said.

Here are some things that auditory learners like you can do to learn better.

- Sit where you can hear.
- Have your hearing checked on a regular basis.
- Use flashcards to learn new words; read them out loud.
- Read stories, assignments, or directions out loud.
- Record yourself spelling words and then listen to the recording.
- Have test questions read to you out loud.
- Study new material by reading it out loud.

Remember that you need to **hear** things, not just see things, in order to learn well.

Please find below my results for a Psychometric Institute Mechanical Aptitude test

Your result

The mechanical aptitude test measures your ability to quickly learn and apply basic mechanical principles to solve work-related problems.

| Poor | Low | | Average | | | | High | Very High | |
|------|-----|---|---------|---|---|---|------|-----------|----|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |

You attempted 8 of 8 questions and answered 8 correctly. Click on each question number below to view a detailed explanation of the correct answer.

Q1 Q2 Q3 Q4 Q5 Q6 Q7 Q8

The above results make me feel that I have the ability to take control of a situation and also be light-hearted and can please MOST people in the group and see all sides of a story before passing judgment influencing the behavior in my team to excel in helping out the others in the group where applicable and in a result striving for the best possible outcome we as a team can archive.

Taking this all in to account I believe when forming a team it will help with decision making and gaining some direction at the start of the project
